SOFTWARE ENGINEER

Full-stack software engineer building mobile-first products backed by clean APIs in Go/Node/PHP and Flutter/React frontends. Strong on API contracts, data flow, and production integration. Experienced in building secure, scalable services for fintech, healthcare, and social platforms.

Technical Skills

Frontend: React, TypeScript, JavaScript (ES6+), Vue.js, Nuxt, Next.js, Tailwind CSS, Redux Toolkit, HTML5, CSS3

Backend: Go (Gin/Fiber/net-http), Node.js (Fastify/Express), PHP (Laravel), Python (Flask/FastAPI), REST APIs, WebSockets

Mobile: Flutter, React Native, Expo

Databases: MongoDB, PostgreSQL, MySQL, Redis, SQLite

Cloud & DevOps: Docker, Docker Compose, Jenkins, Nginx, AWS (EC2/S3), Linux, CI/CD pipelines, Git/GitHub/Bitbucket

Security & Quality: JWT auth, OAuth flows, RBAC, API validation, rate limiting, Helmet/CORS hardening, audit logging, testing with Jest/Mocha/PHPUnit

Experience

Payserve Limited

Software Developer (05/2024 – Present)

- Build and maintain production services for invoicing, payment workflows, resident operations, and communication pipelines.
- Design REST APIs and background workers consumed by React and mobile applications, ensuring predictable contracts across teams.
- Implement integrations around M-Pesa/Daraja, email, and SMS channels to support transaction updates and customer engagement.
- Improve service reliability through structured logging, queue-based processing, and better failure handling for async jobs.
- Optimize MongoDB/PostgreSQL queries and indexes to improve consistency of API response times under growing load.
- Collaborate with product and frontend teams to translate operational requirements into practical, maintainable backend features.

Belva Digital

Software Developer (12/2021 – 03/2024)

- Built and maintained client-facing applications using Laravel, Go, and Node.js for campaign and business platforms.
- Designed relational database schemas in MySQL/PostgreSQL with attention to performance, normalization, and reporting needs.
- Worked closely with frontend engineers to define API payloads and reduce integration friction during delivery.
- Refactored backend modules to improve maintainability and reduce response-time bottlenecks in core workflows.
- Contributed to deployment/readiness activities including environment setup, bug triage, and post-release fixes.

Deveint Limited

Software Developer (05/2021 – 11/2021)

- Built backend services in Go for core business logic and API endpoints used by internal and client-facing products.
- Delivered supporting Python services for selected integrations, utilities, and workflow-specific backend tasks.
- Integrated and maintained APIs consumed by Flutter, React, and Next.js applications with stable data contracts.
- Designed data models and query patterns to improve consistency, correctness, and developer onboarding speed.
- Collaborated across teams during feature planning, implementation, testing, and production issue resolution

Soft IQ Technologies Ltd

Software Developer (03/2021 – 08/2021)

- Developed operational dashboards using React and FastAPI to improve visibility for logistics and internal reporting.
- Implemented authentication and admin features using JWT-based access controls with role-aware dashboard behavior.
- Configured Linux server workflows including SSH deployment routines and Nginx service configuration.
- Assisted with integration work connecting business processes to Microsoft Dynamics 365 and custom APIs.
- Adopted team Git workflows, code review habits, and release discipline in a production-oriented environment.

Projects

Task Management App

(Go, Gin, React/Wails, PostgreSQL)

[Github](#)

The Task Management App is a mobile-first productivity system that allows users to create, update, and track tasks through API-driven workflows.

- Built Flutter task UI integrated with Go-based REST endpoints and MySQL-backed persistence.
- Implemented CRUD flows for tasks with date handling and predictable API-driven state updates.
- Connected frontend and backend using clean JSON contracts to simplify mobile and web testing.
- Improved user flow with clear form behavior and practical error feedback during task operations.

Match Social Platform Backend

(Go, Gin, Flutter, PostgreSQL, Redis, S3/MinIO)

[Github](#)

Match is a social-discovery and engagement application that powers OTP auth, profiles, discovery/swipes, messaging, reels/stories, and moderation workflows.

- Designed media upload flow using pre-signed URLs and object storage to reduce API payload pressure.
- Added operational safeguards such as rate limits for OTP, swipes, and messages to reduce abuse risk.
- Built reusable response/error patterns to improve frontend integration consistency and supportability.
- Worked with Redis-backed patterns and relational data models to balance speed and transactional correctness.

Mobo Eats

Go, Gin, Flutter, PostgreSQL, WebSockets, Maps

[App Store](#) | [Google Play](#)

Mobo Eats is an all-in-one on-demand commerce platform that lets users order meals, groceries, and nutrient supplements from a single app, with optional web ordering

- Built backend capabilities for merchant/customer flows including storefront onboarding, product/menu management, and order lifecycle tracking.
- Implemented real-time order status updates and tracking-oriented interactions to keep customers and merchants synchronized.
- Supported personalized experiences such as tailored recommendations, diet-focused options, and convenience-first multi-category discovery.
- Integrated location-aware delivery/discovery behavior with map-based support for smoother ordering and fulfillment operations.

Education

Moringa School

Full Stack Software Development Certificate

12/2023 – 06/2024

Technical	University	of	Kenya
BSc.	Business	Information	Technology
06/2019 – 12/2023
