PYTHON-FOCUSED SOFTWARE ENGINEER

Professional Summary

Python-capable software engineer with practical experience building backend services, dashboards, and API-integrated systems alongside Go, Node.js, and PHP stacks.

Technical Skills

- **Frontend:** React, TypeScript, JavaScript (ES6+), Vue.js, Nuxt, Next.js, Tailwind CSS, Redux Toolkit, HTML5, CSS3
- **Backend:** Go (Gin/Fiber/net-http), Node.js (Fastify/Express), PHP (Laravel), Python (Flask/FastAPI), REST APIs, WebSockets
- **Mobile:** Flutter, React Native, Expo
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis, SQLite
- **Cloud & DevOps:** Docker, Docker Compose, Jenkins, Nginx, AWS (EC2/S3), Linux, CI/CD pipelines, Git/GitHub/Bitbucket
- **Security & Quality:** JWT auth, OAuth flows, RBAC, API validation, rate limiting, Helmet/CORS hardening, audit logging, testing with Jest/Mocha/PHPUnit

Experience

Payserve Limited — Software Developer (02/2024 – Present)

- Build and maintain production services for invoicing, payment workflows, resident operations, and communication pipelines.
- Design REST APIs and background workers consumed by React and mobile applications, ensuring predictable contracts across teams.
- Implement integrations around M-Pesa/Daraja, email, and SMS channels to support transaction updates and customer engagement.
- Improve service reliability through structured logging, queue-based processing, and better failure handling for async jobs.
- Optimize MongoDB/PostgreSQL queries and indexes to improve consistency of API response times under growing load.
- Collaborate with product and frontend teams to translate operational requirements into practical, maintainable backend features.

Belva Digital — Software Developer (09/2022 – 01/2024)

- Built and maintained client-facing applications using Laravel, Go, and Node.js for campaign and business platforms.
- Designed relational database schemas in MySQL/PostgreSQL with attention to performance, normalization, and reporting needs.
- Worked closely with frontend engineers to define API payloads and reduce integration friction during delivery.
- Refactored backend modules to improve maintainability and reduce response-time bottlenecks in core workflows.
- Contributed to deployment/readiness activities including environment setup, bug triage, and post-release fixes.

Deveint Limited — Software Developer (03/2022 – 12/2022)

- Built backend services in Go for core business logic and API endpoints used by internal and client-facing products.
- Delivered supporting Python services for selected integrations, utilities, and workflow-specific backend tasks.
- Integrated and maintained APIs consumed by Flutter, React, and Next.js applications with stable data contracts.
- Designed data models and query patterns to improve consistency, correctness, and developer onboarding speed.
- Collaborated across teams during feature planning, implementation, testing, and production issue resolution.

Soft IQ Technologies Ltd — Software Developer Intern (07/2021 – 03/2022)

- Developed operational dashboards using React and FastAPI to improve visibility for logistics and internal reporting.
- Implemented authentication and admin features using JWT-based access controls with role-aware dashboard behavior.
- Configured Linux server workflows including SSH deployment routines and Nginx service configuration.
- Assisted with integration work connecting business processes to Microsoft Dynamics 365 and custom APIs.
- Adopted team Git workflows, code review habits, and release discipline in a production-oriented environment.

Selected Projects

Log/Message Web App (Flask)

- This Flask application is a lightweight web system for capturing, storing, and displaying submitted messages from a browser interface.
- Built Flask-based form and message logging workflow with server-rendered templates.
- Implemented environment-driven configuration for logs and runtime settings across environments.
- Structured request handling and persistence logic for straightforward support and maintenance.
- Containerized service for repeatable setup and easier deployment in isolated environments.

React + FastAPI Dashboards (Soft IQ period)

- These dashboard systems support logistics/operations visibility by combining React frontends with Python API services for internal teams.
- Contributed backend/API and integration support for dashboard-oriented operational tools.
- Implemented secure authentication-oriented flows and access behavior aligned to user roles.
- Worked with frontend teams to align endpoint responses with visualization/reporting requirements.
- Helped stabilize features through debugging, iteration, and issue follow-up across releases.

Hybrid Multi-Stack Delivery

- This delivery approach combines Python, Go, Node.js, and Laravel services to solve problems using the most practical tool per module.
- Used Python selectively for internal tooling, integrations, and utility workflows where it fit best.
- Collaborated across Go, Node.js, and Laravel services to deliver end-to-end features.
- Maintained pragmatic coding standards to keep cross-stack handoffs and troubleshooting efficient.
- Balanced speed and stability when moving from prototypes to production-supportable implementations.

Education

- Moringa School — Full Stack Software Development Certificate (12/2023 – 06/2024)
- Technical University of Kenya — BSc. Business Information Technology (06/2019 – 12/2023)
