IT SYSTEMS & SOFTWARE SUPPORT CV

Professional Summary

IT and software professional with strong hands-on experience in systems deployment, integration support, backend operations, and business application delivery. Combines development depth with practical infrastructure and troubleshooting skills.

Technical Skills

- **Frontend:** React, TypeScript, JavaScript (ES6+), Vue.js, Nuxt, Next.js, Tailwind CSS, Redux Toolkit, HTML5, CSS3
- **Backend:** Go (Gin/Fiber/net-http), Node.js (Fastify/Express), PHP (Laravel), Python (Flask/FastAPI), REST APIs, WebSockets
- **Mobile:** Flutter, React Native, Expo
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis, SQLite
- **Cloud & DevOps:** Docker, Docker Compose, Jenkins, Nginx, AWS (EC2/S3), Linux, CI/CD pipelines, Git/GitHub/Bitbucket
- **Security & Quality:** JWT auth, OAuth flows, RBAC, API validation, rate limiting, Helmet/CORS hardening, audit logging, testing with Jest/Mocha/PHPUnit

Experience

Payserve Limited — Software Developer (02/2024 – Present)

- Build and maintain production services for invoicing, payment workflows, resident operations, and communication pipelines.
- Design REST APIs and background workers consumed by React and mobile applications, ensuring predictable contracts across teams.
- Implement integrations around M-Pesa/Daraja, email, and SMS channels to support transaction updates and customer engagement.
- Improve service reliability through structured logging, queue-based processing, and better failure handling for async jobs.
- Optimize MongoDB/PostgreSQL queries and indexes to improve consistency of API response times under growing load.
- Collaborate with product and frontend teams to translate operational requirements into practical, maintainable backend features.

Belva Digital — Software Developer (09/2022 – 01/2024)

- Built and maintained client-facing applications using Laravel, Go, and Node.js for campaign and business platforms.
- Designed relational database schemas in MySQL/PostgreSQL with attention to performance, normalization, and reporting needs.
- Worked closely with frontend engineers to define API payloads and reduce integration friction during delivery.
- Refactored backend modules to improve maintainability and reduce response-time bottlenecks in core workflows.
- Contributed to deployment/readiness activities including environment setup, bug triage, and post-release fixes.

Deveint Limited — Software Developer (03/2022 – 12/2022)

- Built backend services in Go for core business logic and API endpoints used by internal and client-facing products.
- Delivered supporting Python services for selected integrations, utilities, and workflow-specific backend tasks.
- Integrated and maintained APIs consumed by Flutter, React, and Next.js applications with stable data contracts.
- Designed data models and query patterns to improve consistency, correctness, and developer onboarding speed.

- Collaborated across teams during feature planning, implementation, testing, and production issue resolution.

Soft IQ Technologies Ltd — Software Developer Intern (07/2021 – 03/2022)

- Developed operational dashboards using React and FastAPI to improve visibility for logistics and internal reporting.
- Implemented authentication and admin features using JWT-based access controls with role-aware dashboard behavior.
- Configured Linux server workflows including SSH deployment routines and Nginx service configuration.
- Assisted with integration work connecting business processes to Microsoft Dynamics 365 and custom APIs.
- Adopted team Git workflows, code review habits, and release discipline in a production-oriented environment.

Selected Projects

Business Systems Integration (Payserve ecosystem)

- This integration work supports real-world business operations by connecting payments, invoicing, notifications, and resident service modules.
- Handled API integration checks, payload validation, and service-to-service troubleshooting across environments.
- Worked with MongoDB/PostgreSQL-backed workflows to maintain data consistency and operational continuity.
- Partnered with product/operations users to convert process pain points into practical system improvements.
- Contributed to incident follow-up and remediation to keep core workflows available for end users.

Deployment & Operations Tooling

- This tooling layer standardizes deployment and operations through containerization, CI/CD, Linux configuration, and monitoring-first practices.
- Configured containerized services and CI/CD workflows to improve release confidence and repeatability.
- Maintained Linux/Nginx deployment patterns and environment configuration practices for stable runtime behavior.
- Used logs, metrics-style signals, and verification checklists to diagnose and resolve production issues.
- Improved handover quality with clearer setup practices and support-oriented technical documentation.

Internal Dashboards & Process Automation

- These dashboards and automation routines improve day-to-day IT/business support by reducing manual effort and speeding up issue handling.
- Delivered admin and support dashboards that improved process visibility and reporting speed.
- Built automation helpers that reduced repetitive operations and improved team productivity.
- Integrated data and communication flows to keep business users informed in near real time.
- Continuously refined workflows based on user feedback and observed operational bottlenecks.

Education

- Moringa School — Full Stack Software Development Certificate (12/2023 – 06/2024)
- Technical University of Kenya — BSc. Business Information Technology (06/2019 – 12/2023)
