SOFTWARE ENGINEER

A dedicated Full-stack software engineer focused on JavaScript/TypeScript ecosystems, building high-throughput backend APIs and rich React/Vuejs frontends for finance and operations products. Experienced in building secure, scalable services for fintech, healthcare, property management and social platforms.

Technical Skills

Frontend: React, TypeScript, JavaScript (ES6+), Vue.js, Nuxt, Next.js, Tailwind CSS, Redux Toolkit, HTML5, CSS3

Backend: Go (Gin/Fiber/net-http), Node.js (Fastify/Express), PHP (Laravel), Python (Flask/FastAPI), REST APIs, WebSockets

Mobile: Flutter, React Native, Expo

Databases: MongoDB, PostgreSQL, MySQL, Redis, SQLite

Cloud & DevOps: Docker, Docker Compose, Jenkins, Nginx, AWS (EC2/S3), Linux, CI/CD pipelines, Git/GitHub/Bitbucket

Security & Quality: JWT auth, OAuth flows, RBAC, API validation, rate limiting, Helmet/CORS hardening, audit logging, testing with Jest/Mocha/PHPUnit

Experience

Payserve Limited

Software Developer (05/2024 – Present)

- Build and maintain production services for invoicing, payment workflows, resident operations, and communication pipelines.
- Design REST APIs and background workers consumed by React and mobile applications, ensuring predictable contracts across teams.
- Implement integrations around M-Pesa/Daraja, email, and SMS channels to support transaction updates and customer engagement.
- Improve service reliability through structured logging, queue-based processing, and better failure handling for async jobs.
- Optimize MongoDB/PostgreSQL queries and indexes to improve consistency of API response times under growing load.

- Collaborate with product and frontend teams to translate operational requirements into practical, maintainable backend features.

Belva Digital

Software Developer (12/2021 – 03/2024)

- Built and maintained client-facing applications using Laravel, Go, and Node.js for campaign and business platforms.
- Designed relational database schemas in MySQL/PostgreSQL with attention to performance, normalization, and reporting needs.
- Worked closely with frontend engineers to define API payloads and reduce integration friction during delivery.
- Refactored backend modules to improve maintainability and reduce response-time bottlenecks in core workflows.
- Contributed to deployment/readiness activities including environment setup, bug triage, and post-release fixes.

Deveint Limited

Software Developer (05/2021 – 11/2021)

- Built backend services in Go for core business logic and API endpoints used by internal and client-facing products.
- Delivered supporting Python services for selected integrations, utilities, and workflow-specific backend tasks.
- Integrated and maintained APIs consumed by Flutter, React, and Next.js applications with stable data contracts.
- Designed data models and query patterns to improve consistency, correctness, and developer onboarding speed.
- Collaborated across teams during feature planning, implementation, testing, and production issue resolution.

Soft IQ Technologies Ltd

Software Developer (03/2021 – 08/2021)

- Developed operational dashboards using React and FastAPI to improve visibility for logistics and internal reporting.
- Implemented authentication and admin features using JWT-based access controls with role-aware dashboard behavior.
- Configured Linux server workflows including SSH deployment routines and Nginx service configuration.
- Assisted with integration work connecting business processes to Microsoft Dynamics 365 and custom APIs.

- Adopted team Git workflows, code review habits, and release discipline in a production-oriented environment.

Projects

Payserve Platform

Node.js/Fastify/Express, React, MongoDB, PostgreSQL, Redis, RabbitMQ

[Demo](#)

Payserve is an end-to-end property and payment operations ecosystem that handles invoicing, communication, facility workflows, and M-Pesa-integrated transaction flows.

- Worked across payserve_backend, levy management, resident/core/admin interfaces, and M-Pesa-related modules.
- Applied security and platform hardening patterns including Helmet/CORS, JWT auth, validation, and controlled access.
- Used Redis and queue-driven processing to improve responsiveness for high-latency and asynchronous workflows.
- Enhanced React dashboards with role-aware flows, analytics views, reporting exports, and improved state handling.
- Contributed to cross-service debugging and data consistency checks across MongoDB and PostgreSQL contexts.

M-Pesa Daraja GlobalService

Node.js, Express, MongoDB

[Github](#)

This is an Express + MongoDB M-Pesa integration API for multi-tenant businesses, supporting C2B validation/confirmation, STK push, and callback/webhook processing

- Implemented STK endpoints for push initiation, callback handling, status query, and reference-based transaction lookup.
- Implemented C2B endpoints for validation, confirmation, URL registration, and sandbox simulation per business.
- Built business/account/transaction modules with scoped models and indexed transaction fields for reconciliation and reporting.
- Maintained transaction lifecycle states (PENDING, VALIDATED, COMPLETED, FAILED, etc.) with internal
- references, callback payload capture, and stats aggregation.

Payserve Mobile App

Node.js, React Native, Tailwind

[App Store](#) | [Google Play](#)

Payserve Mobile App is the mobile counterpart of the Payserve system, delivering core operational workflows on handheld devices.

- Built mobile-first user flows in React Native for day-to-day activities that mirror Payserve web capabilities.
- Integrated Node.js backend APIs for authentication, resident operations, communications, and payment-related interactions.
- Used utility-first styling with Tailwind-based patterns for consistent, responsive, and maintainable mobile UI components.

Education

Moringa School

Full Stack Software Development Certificate

12/2023 – 06/2024

Technical	University	of	Kenya
BSc.	Business	Information	Technology
06/2019 – 12/2023
