

MARVIN OKONGO

SOFTWARE ENGINEER CV

Nairobi, Kenya · +254 720 538 053 · okongomarvin971@gmail.com · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience building enterprise applications, payment platforms, property management systems, and business integrations. Specializes in ASP.NET Core, C#, scalable APIs, multi-tenant architectures, and Microsoft technologies including Dynamics 365 Business Central and AL. Experienced across Go, Node.js, Laravel, Python, and React, with expertise in AI-assisted development and configuring AI coding agents to improve software delivery and developer productivity.

TECHNICAL SKILLS

- **Languages:** C#, JavaScript, Go, PHP, Python, AL(Business Central)
- **Backend:** ASP.NET Core 9, Entity Framework Core, Node.js (Express, Fastify), Laravel 12, FastAPI, Django, Gin, Gorilla Mux
- **Frontend:** React, Next.js, React Naive
- **Cloud:** OCI, AWS, Docker, CI/CD, Jenkins, Azure, Git, Bitbucket
- **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB, Redis
- **AI Engineering & Agent Workflows:** Claude Code, GitHub Copilot, Codex CLI, IBM watsonx, Langflow, Dify, OpenHands, OpenClaw, OpenCode

EXPERIENCE

Payserve Limited

Software Developer

03/2024 – Present

Built a cloud-based property management platform that enables landlords and property managers to manage residential and commercial properties from a single system.

- Designed REST APIs for authentication, payment processing, inventory management, and asynchronous background jobs.
- Implemented enterprise authentication using RBAC, MFA, audit logging, and session security.
- Improved data access patterns across MongoDB and PostgreSQL to support increasing transaction volumes.
- Delivered client solutions across Laravel, .NET, JS and Node.js environments.
- Integrated multiple third-party payment providers and business services.
- Used Claude Code to plan features, refactor larger codebases, generate unit tests, and speed up day-to-day development — always reviewing generated code before it goes anywhere near production.

Zetech University

System Integration Developer (Contract)

03/2026 - 06/2026

Developed integrations that synchronized data between Moodle, the Student Management System, Microsoft Dynamics 365 Business Central, and internal university systems.

- Built an automated suspension engine, synchronizing finance and academic status across systems.
- Corrected over 38,000+ inconsistent usernames in production without downtime.
- Automated synchronization processes that previously required manual intervention.

Podium Streak

Software Developer

11/2022 – 01/2024

Developed a cloud-based Point of Sale (POS) platform for salons, barbershops, supermarkets, restaurants, pharmacies, and other retail businesses, enabling sales, inventory, payments, and financial management.

- Built backend services and scalable REST APIs using ASP.NET Core (C#).
- Integrated QuickBooks, KRA eTIMS, and Business Central for accounting, tax compliance, and ERP synchronization.
- Implemented local and international payment integrations, including reusable multi-tenant M-Pesa payment services.
- Designed contract-first APIs, enabling parallel frontend and backend development.
- Implemented background jobs for invoice synchronization, payment callbacks, notifications, and image processing.
- Explored IBM watsonx for enterprise AI workflows, prompt engineering, and RAG solutions.
- Built AI-assisted workflows for generating documentation, boilerplate code, SQL queries, API specs, and migration scripts, and uses AI agents to break down complex tasks into implementation plans and assist with troubleshooting.

Belva Digital

Software Developer

02/2022 – 11/2022

Developed Laravel-based business systems and administration portals.

- Built REST APIs consumed by web applications.
- Designed relational database schemas using MySQL and PostgreSQL.
- Delivered client solutions across Laravel, Go, and Node.js environments.
- Participated in deployments, production support, and feature delivery.
- Used GitHub Copilot and OpenAI Codex/OpenCode for debugging, API integration work, documentation, and repetitive tasks that don't need full attention.

Deveint Limited

Software Engineer

4/2021 – 01/2022

- Built backend services using Go (Gin) for business applications consumed by Flutter, React, and Next.js clients.
- Designed scalable backend architectures and optimized SQL database performance.
- Developed workflow automation tools supporting internal business operations.
- Supported production deployments and ongoing maintenance.

PROJECTS

Enterprise Employee Management API

ASP.NET Core 9 · Entity Framework Core · SQL Server

[Github](#)

A system for managing employees, departments, roles, leave requests, and user access within an organization through a secure REST API.

- Designed the solution using Clean Architecture to separate business logic, application services, and infrastructure.
- Implemented JWT authentication, role-based authorization, and dependency injection.
- Documented all endpoints with Swagger/OpenAPI and containerized the application using Docker.
- Wrote unit tests for core business logic and API services.

Hospital Appointment Management System

ASP.NET Core · SQL Server · SignalR

[Github](#)

A hospital management backend that streamlines appointment scheduling, patient notifications, and administrative workflows for healthcare providers.

- Developed appointment scheduling APIs with real-time booking updates using SignalR.
- Implemented role-based access control, audit logging, and automated email reminders.
- Designed the system to support concurrent scheduling while maintaining appointment consistency.
- Built secure APIs for managing patients, appointments, and staff workflows.

E-Commerce API

ASP.NET Core · EF Core · Azure Blob Storage

[Github](#)

A scalable backend for online stores that manages products, shopping carts, orders, payments, and customer accounts through secure APIs.

- Developed REST APIs for product catalog management, shopping carts, ordering, and payment processing.
- Integrated Azure Blob Storage for product image management.
- Implemented JWT authentication and role-based administration.
- Wrote unit tests covering ordering and payment workflows.

EDUCATION

Moringa School

Full Stack Software Development Certificate

Technical University of Kenya

BSc. Business Information Technology
